

Amara Johnson

Los Angeles, CA | (323) 555-0184 | amara.johnson.chain@gmail.com | linkedin.com/in/amarajohnsonchain | github.com/ajohnson-chain

SUMMARY

Blockchain Solutions Engineer with 4 years building smart contracts and decentralized applications. Skilled in Solidity, Rust, and Web3.js. Deployed a DeFi protocol securing \$40M+ in total value locked.

TECHNICAL SKILLS

Languages: Solidity, Rust, JavaScript/TypeScript

Blockchain: Ethereum, Solana, Layer 2 (Optimism, Arbitrum)

Tools: Hardhat, Foundry, Web3.js, Ethers.js

Security: Smart contract auditing basics, reentrancy/overflow prevention

Other: IPFS, The Graph, subgraph development

PROFESSIONAL EXPERIENCE

Blockchain Engineer — Ledgerpoint Labs, Los Angeles, CA

Aug 2021 – Present

- Developed and deployed a lending protocol smart contract suite securing \$40M+ in total value locked
- Led a smart contract security review process that caught 6 critical vulnerabilities before mainnet deployment
- Built a subgraph with The Graph to index on-chain events, powering real-time dashboard analytics
- Optimized gas usage across core contracts, reducing average transaction cost by 28%

Solutions Engineer — Harbor Chain Technologies, Los Angeles, CA

Jul 2019 – Aug 2021

- Built proof-of-concept dApps for 5 enterprise clients exploring blockchain supply chain tracking
- Wrote technical documentation and demos that supported closing 3 enterprise pilot contracts

PROJECTS

vote-chain — Solidity, Hardhat, React

- Open-source on-chain voting dApp with quadratic voting support; 150+ GitHub stars

EDUCATION

B.S. Computer Science — UCLA, 2019

CERTIFICATIONS

- Certified Blockchain Developer – Ethereum — Blockchain Council, 2022
