SUMMARY

Database Administrator with 7 years managing high-availability database environments for enterprise clients. Skilled in Oracle, SQL Server, and PostgreSQL. Reduced query response times by 55% company-wide.

TECHNICAL SKILLS

Databases: Oracle, SQL Server, PostgreSQL, MySQL

High Availability: Always On, replication, clustering, failover

Performance Tuning: Query optimization, indexing strategy, execution plan analysis

Backup/Recovery: RMAN, native backups, point-in-time recovery

Scripting: T-SQL, PL/SQL, PowerShell, Bash

PROFESSIONAL EXPERIENCE

Senior Database Administrator — Gulfstream Energy Partners, Houston, TX

Sep 2019 – Present

- Manage 60+ production databases across Oracle and SQL Server, maintaining 99.95% uptime
- Redesigned indexing strategy across core reporting databases, cutting average query time by 55%
- Implemented Always On availability groups, reducing failover time from 20 minutes to under 2 minutes
- Led migration of a legacy Oracle 11g environment to Oracle 19c with zero data loss

Database Administrator — Bayou Financial Group, Houston, TX

Aug 2016 – Sep 2019

- Administered SQL Server environments supporting core banking applications for 200K+ customers
- Automated nightly backup verification, catching 12 backup failures before they became critical

EDUCATION

B.S. Computer Information Systems — University of Houston, 2016

CERTIFICATIONS

- Oracle Certified Professional (OCP) — Oracle, 2021
- Microsoft Certified: Azure Database Administrator Associate — Microsoft, 2022
