Seattle, WA

PROFESSIONAL SUMMARY

Versatile Full Stack Engineer with 4 years of experience building end-to-end web applications. Skilled in combining modern React interfaces with robust Node.js and Python backend services.

CORE SKILLS & TECHNOLOGIES

Key Skills: Python • Node.js • Express • React • MongoDB • Docker • AWS EC2 • GraphQL

WORK EXPERIENCE

Full Stack Engineer — Apex Digital

2022 – Present

- Engineered full-stack features utilizing React on the frontend and Express/Node.js on the backend.
- Deployed containerized application modules to AWS EC2 using Docker.
- Designed MongoDB schema pipelines to support dynamic real-time user feed features.

Junior Developer — SoftSystems

2020 – 2022

- Maintained internal admin portals using Python and React.
- Participated in agile sprints, code reviews, and automated unit testing workflows.

EDUCATION

B.S. in Software Engineering — University of Washington (2016 – 2020)
