SUMMARY

DevOps/Platform Engineer with 6 years automating infrastructure and CI/CD pipelines for SaaS environments. Experienced in AWS, Terraform, and Kubernetes. Cut deployment time by 70% through pipeline redesign.

TECHNICAL SKILLS

Cloud: AWS, GCP

IaC: Terraform, CloudFormation, Ansible

Containers/Orchestration: Docker, Kubernetes, ECS

CI/CD: Jenkins, GitHub Actions, GitLab CI

Monitoring: Prometheus, Grafana, Datadog

Scripting: Bash, Python, Go

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer — Cascadia Software, Denver, CO

Mar 2021 – Present

- Automated infrastructure provisioning with Terraform across 3 AWS accounts, cutting environment setup time by 70%
- Migrated a 40-service platform from EC2 to Kubernetes (EKS), improving deployment reliability and cutting compute cost by 22%
- Built CI/CD pipelines in GitHub Actions enabling 15+ deploys per day with automated rollback
- Managed infrastructure for 200+ nodes, maintaining 99.95% uptime over 18 months

DevOps Engineer — Fieldstone Analytics, Denver, CO

Jul 2018 – Mar 2021

- Containerized 12 legacy services with Docker, standardizing local and production environments
- Set up centralized logging and monitoring with the ELK stack and Grafana, cutting mean time to detection by 45%

PROJECTS

terraform-aws-baseline — Terraform, AWS

- Reusable Terraform module for standing up secure VPC, IAM, and logging baseline; adopted by 4 internal teams

EDUCATION

B.S. Information Technology — Colorado State University, 2018

CERTIFICATIONS

- AWS Certified DevOps Engineer – Professional — Amazon Web Services, 2023
- Certified Kubernetes Administrator (CKA) — CNCF, 2022
